About Me

I'm currently a senior at University of Southern California majoring in Data Science & Economics and am hoping to pursue a career in full stack development post-graduation. I have various backgrounds in leadership roles and a technical background in website development and database management. I'm currently looking for a position starting as early as August 2024.

Work Experience

September 2016 – May 2021 — Volleyball Coach, Saratoga HS & Phoenix Volleyball Clinic
Coached every Sunday at a local volleyball clinic as a freshman in high school all the way through senior year of high school. As a freshman at USC, coached boys and girls varsity volleyball at Saratoga HS.

August 2020 – August 2022 — Shift Manager, TPTEA
Worked part-time at a local tea shop during my freshman year and the summer of my sophomore year. Responsibilities included making shift schedules, ordering ingredients, making drinks, and brewing tea.

June 2023 – August 2023 — Director, KE Camps Palo Alto Hills Golf & Country Club
As the director at a camp, my primary responsibilities were to create the camp schedules, make the staff schedules, and manage the weekly budget. I was in charge of a 4 person staff and oversaw roughly 20 kids per week. I also was the primary point of communication between our HQ and the country club which entailed filing roster reports, meeting with other country club staff, and scheduling calls between HQ and the club.
